

employee benefits

Some examples of group risk benefits include:

Group Life / Group Critical Illness

We can set up group life schemes to pay a lump sum on the death of an employee. It is also possible to include critical illness cover which will pay a lump sum following diagnosis of an insured condition.

Group Income Protection

We advise and arrange schemes which will either pay the employer or the individual concerned replacement income should they be unable to work for a defined period.

Keyperson Assurance

In addition to our group risk services, we offer insurance based solutions to help businesses insure against the financial impact of death or serious illness to key staff or business owners.

We also offer shareholder / partnership protection schemes to allow business to continue following the death of a shareholding director or partner.
